Guidelines for Documenting Chronic Medical/Health Disabilities

These guidelines apply to students who have chronic disabilities in the following areas:

• **Mobility** - such as use of wheelchair, crutches, or cane, or impaired hand coordination
• **Systemic** - includes chronic illnesses or conditions such as diabetes and epilepsy
• **Acquired brain injury** - affecting processing speed, memory, communication, motor, sensory, physical, and/or psychosocial abilities.

Students requesting accommodations for a disability listed above are asked to submit documentation that meets the guidelines listed below. In addition, individuals with acquired brain injury may need to submit a psycho-educational test battery, as referenced in the documentation guidelines for learning disabilities.

1.) **A Qualified Evaluator.** Professionals conducting assessments, rendering a medical diagnosis, and making recommendations for appropriate accommodations must be qualified to do so. These are physicians, including licensed M.D.’s and D.O.’s. Documentation must meet the following criteria:

   - include evaluator’s name, title, professional credentials, license and/or certification number,
   - be presented on the professional's letterhead, typed, dated, signed, and legible,
   - the evaluator may not be a family member.

2.) **Current Documentation.** Reasonable accommodations are based on the current impact of a disability. Therefore, it is critical that medical documentation describe an individual’s current level of functioning and need for accommodations. A full report from a treating healthcare professional completed within the past twelve months is considered current, unless the condition is permanent/unchanging. The documentation may need to be updated annually so that we can best accommodate the student.

3.) **Comprehensive Evaluation.** Medical disabilities encompass a myriad of conditions. In addition, medical conditions are often changeable in nature, and sometimes difficult to categorize. Documentation must therefore be thorough, giving a full picture of the individual, not simply a diagnosis. A diagnosis alone is not a basis for accommodation. Documentation must include:

   - **Discussion of:**
     - a history of presenting symptoms and relevant medical history
     - description of current impairment
     - a summary of assessment procedures and evaluation instruments/reports used
     - diagnosis duration and severity of the disorder
     - treatment and medication history, including medication side effects
     - if applicable, documentation of assistive devices and technology used, with estimated effectiveness; this would include a history of any disability-related accommodation(s)
     - status of the individual’s condition - static, improving, or degrading
     - expected progression of the condition over time

   - **A clear** diagnosis of medical disability must be rendered including:
     - **clear statement of** diagnosis, the subtype if applicable, with ICD-10 code
     - the diagnostic criteria on which the diagnosis is based
     - **CANNOT INCLUDE** wording such as "seems to indicate" or "suggests."

Disability Services
1600 Campus Road F-50, Los Angeles, CA 90041-3314 | (323) 259-2969 | oxy.edu/disability-services
• The current functional limitations – the ways that the diagnosed disability substantially limits the student in a major life activity – of the individual in an academic environment.
• Appropriate and specific recommendations for accommodation in an academic environment, accompanied by clear rationale supported by interview, observation, and/or testing.

4.) Supporting Documentation. While required, the report of the qualified evaluator is by no means the only documentation we can use to better understand and accommodate the student with a chronic medical disability. Other helpful documents are: records of accommodation on standardized tests such as SAT or ACT, high school 504 plans or IEP’s.
