

Student Intern for Food Systems Research

Campus Dining

Fall 2020

Duties/Responsibilities:

- The Student Intern for Food Systems Research will perform research for Campus Dining regarding external food systems in which Oxy plays a role. This research will especially center on the upheaval to the food system caused by COVID-19, and will include disruptions to supply and demand, other college's responses, and the transformation of third party sustainability standards such as the Real Food Challenge. The student intern will perform guided research on these topics, and organize summaries of their findings. Research avenues will include internet research in addition to directly contacting points of information.
- Second year candidates preferred. We are looking for someone who will help out during the Fall 2020 semester with the potential to stay on for future semesters, in this role or an expanded role.

Qualifications/Preferences:

- Strong research skills
- Clear written communication skills
- Dependable and detail oriented
- Creative problem solving, and ability to identify and adapt to new strategies
- Knowledgeable or interested in environmental sustainability and food justice
- Responsive to email
- Self-motivated and a positive attitude
- Ability to perform detailed research from general research prompts

Work study/work award required. Work schedule is flexible, and around 4 hours per week.

Starting Pay Rate: \$15.00/Hour

Work can be on site, remote or a combination of both

To apply, please email dining@oxy.edu with your resume, a cover letter (250-500) words
